

II. Amendments to the Drawings

Replacement sheet 1 of the drawings, which includes changes to Figure 1 is attached.

Specifically, Figure 1 was amended to illustrate that the left-hand recess 17 is of slightly lesser dimension compared to the right-hand recess 15, and thus the left-hand recess 17 will be provided with no freedom of movement for the left-hand mounting element as disclosed in paragraphs [0024], [0030]-[0031]. This amendment was in response to an objection that the mounting elements (left-hand and right-hand) appeared identical and would be considered to have the same degree of freedom of movement within their respective recesses 15 and 17. Accordingly, Applicants believe that this amendment has cured the respective objection.

Moreover, Applicants have amended the paragraph [0024] of the specification to recite that the slightly lesser dimension of the left-hand recess is schematically shown in Figure 1 for illustrative purposes only. Accordingly, Applicants believe that the amendment to Figure 1 is not new matter.
